

**SHENANDOAH VALLEY ELECTRIC COOPERATIVE
MT. CRAWFORD, VIRGINIA**

**SCHEDULE PHQ
LIGHT AND POWER SERVICE**

AVAILABILITY

Available for loads of 50 kw or greater at standard single phase and three phase voltages. The standard voltages available depend upon location, character and size of the Consumer's load. This information can be furnished at any of the Cooperative's offices. Service shall not be available for Standby or Maintenance Service such as that required for alternative generation facilities.

Available to all Member/Consumers of this class within the new service territory acquired from Potomac Edison Company.

MONTHLY RATE

A. Distribution Charge

1. Basic Consumer Charge \$37.09 per billing month
2. Variable Distribution Charge
 - (a) Demand Charge:
 - Minimum kw @\$.83 per kw
 - All kw as set forth below under "Determination of Capacity"
@\$1.48 per kw
 - (b) Energy Charge:
 - First 100,000 kwhs @0.552 cents per kwh
 - Over 100,000 kwhs @0.499 cents per kwh
3. Voltage Discount (kw):
 - 2kv to 15 kv @\$.25 per kw
 - Over 15 kv @\$.50 per kw
4. RKVA Charge:

Rkva charge is applied to the Consumer's rkva capacity requirement in excess of 25% of the consumer's kw capacity.

 - (a) Rkva @\$.40 per rkva

B. Power Supply Charge

1. Power Supply Charge
 - (a) Demand Charge:
 - Minimum kw @\$.391 per kw
 - All kw as set forth below under "Determination of Capacity"
@\$.634 per kw
 - (b) Energy Charge:
 - First 100,000 kwhs @2.327 cents per kwh
 - Over 100,000 kwhs @2.105 cents per kwh

2. The above charges are subject to the Levelized Purchased Power Factor, Schedule LPPFQ, or the Cooperative's Wholesale Power Cost Adjustment Clause, Schedule WPA-1Q

MINIMUM CHARGE

Capacity to be used in determining the minimum charge shall be one-half of the highest kilowatt capacity required in the preceding eleven months

DETERMINATION OF CAPACITY

Kilowatt Capacity

Kilowatt billing capacity during a billing period shall be the highest of the following but not less than 50 kilowatts

1. The maximum 30 minute metered kilowatt capacity, or
2. 50% of the maximum instantaneous kilowatt capacity, or
3. The billing capacity as determined under "off-peak" Service.

Off-Peak Service

For Consumers whose contracted kilowatt capacity is 200 kilowatts or greater and who contract for off-peak Service, the billing capacity for any month shall be the maximum capacity measured during "on-peak" hours plus 25% of the amount that the maximum capacity measured during "off-peak" hours exceeds the maximum "on-peak" capacity.

"Off-Peak" hours shall be from 10:00 PM to 7:00 AM daily plus all hours of Sunday.

Reactive Kilovoltampere Capacity

Capacity required is the highest metered demand in reactive kilovolt-amperes established over a 30-minute interval during a billing period.

Reactive meters will be installed when the Consumer's kilowatt capacity exceeds 200 kilowatts.

Kilowatts and reactive kilovolt-amperes will be computed to the nearest whole number.

Term

A one year minimum term is required for Distribution Charges. When the Cooperative's net investment in local facilities is \$10,000 or more for new or upgraded connections, an Electric Service Agreement with at three year minimum term is required for Distribution Charges.

Special Transformation Facilities

The Cooperative normally supplies and meters Service at one voltage.

When the Consumer requires Service at more than one voltage and Service is metered at primary voltage or its equivalent, the following conditions apply:

For installations prior to December 13, 1985 the Cooperative may provide, in addition to primary voltage, two transformer banks and the Consumer provides all interconnecting facilities. Voltage discount shall not apply.

For installations between December 13, 1985 and November 20, 1994, the Cooperative may provide, in addition to primary voltage, one transformer bank and the Consumer provides all interconnecting facilities. Voltage discount shall not apply.

For installations after November 20, 1994, the Cooperative will provide Service at primary voltage and the Consumer provides, owns and maintains all facilities beyond the Cooperative's primary meter point. Voltage discount shall apply.

Special Service

When the Cooperative must install transformers or other equipment to provide Service for the welding loads or other highly fluctuating loads, the Cooperative shall have the option of measuring to the kilowatts and the reactive kilovolt-amperes required, by instantaneous meters and 50% of the values so found shall be used in determining the kilowatts and reactive kilovolt-amperes used for billing.

CONSUMPTION TAX

Applies to all kilowatt-hours served under this Rate Schedule

LATE PAYMENT CHARGE

Applies to this Rate Schedule
